Masonic Celebration

Dominion Day, with its many offerings in the Calgary Fair, the opening of the fishing season and the ideal weather for motoring and driving, was thoroughly enjoyed locally. A large number took advantage of the cheap rates to go a-golfing. Many private picnic parties sought out the shady spots along the river where the trout whipped the streams for the elusive trout. The local Masons chose this as the day for their picnic and in the morning fifteen automobiles assembled at the I.O.O.F. Open House and the members of the local lodge with their friends filled the gaily decorated cars to the limit. At nine o'clock the procession got under way and made for a grove on Trout Creek at St. W. A. Lyndon's ranch. The committee on transportation, Messrs. N. Holmes and J. T. Kingley, had their arrangements working like clock works and very soon after the arrival of the party at the picnic ground the successful effort of the refreshment committee, Messrs. J. B. Boes and W. T. Cochran, was very much in evidence. A well-stocked cafeteria was opened in the shade of the trees lining Trout Creek at the picnic spot and with the minimum of labor everyone was able to take advantage of the many delicacies which the ladies had prepared. Plenty of ice cream and lemonade helped to allay the heat of the day and cool off the picnickers, while from the cool refreshments for which the Lyndon ranch is famous, dishes of cold meat, cake and sandwiches enough to feed a small army, satisfied the appetites quenched by the delightful motor journey. The picnic picked out varying scenes. Neighbors visited with each other, oil prospects were thoroughly gone over, antelopes and sunflowers were discovered, championships at whis were settled in the tree-shaded, surreptitious baths were enjoyed, everyone enjoyed to the full, himself and herself, each in the way most to be desired. Business worries were cast aside, the conditions of the crops were forgotten, maturity gave place to childhood again, coats and vests were shown with delightful abandon, the audience investigation files were ignored and refreshing informality was in order.

Five Mile

Mr. Alfred Berg is still confined to the house on account of his rheumatism.

Miss Georgia Redpath of Frazee, Minn., is here visiting friends and relatives.

Mr. Isaac Lepard and daughter Mina spent one day last week at the fair in Calgary.

Mr. and Mrs. O. J. Berg and family went to the hills on Saturday evening for an outing.

Miss Violet Gibb is in Calgary having her eyes treated. From her report she is getting along fine.

Mr. and Mrs. T. P. Mosley left on June 30th for Walla Walla Wash., and points in Idaho and Oregon.

On Saturday July 4th the Alberta Sundance Club members, their families and a few invited guests numbering in all 75 spent the day picnicking on Willow Creek at the dam west of town. There were sports for the little folks also a few races for the grown-ups. The prize winners being Russel Berg, Elmer Fredrickson, Nora Berg, Luee Carey, Harry Mosley, Ray Wilhite, Wilbur Anna'sle, Walter Fredrickson.

W. C. T. U.

An exhibit which was visited by thousands and which marks a forward movement on the part of the Alberta Temperance and Moral Reformation League in an aggressive campaign to bring about such a temperance sentiment that the influence of the liquor traffic in this province will soon be ousted, was located in the Agricultural Hall at the recent exhibition at Calgary. The location in this hall may not have been the most prominent place to attract the attention of all the Fair visitors but it was of a unique character that it attracted considerable attention. A large sign first challenged the attention. It read "Abolish the Liquor Traffic. Vote for Provincial Prohibition 1915." In the building there were a number of very catchy cartoons. Among the best were "The Battle Against the Bottles" which showed Santa Claus' visit on Xmas night to a home where his entrance was prevented by a big whiskey bottle which blocked the doorway; "The Boy or the Boy, Which?" showing the innocent boy with the bottle and a serpent seeking his destruction. The long snake with fangs protruding is coiled about the bottle ready to strike. This is the strongest thing of the kind on the continent and is being reproduced in all the cities of this province on bill-boards.

A cooperative creamery is an institution of this kind. It is here far as reaching and the extent of which depend entirely upon the volume of business which the creamery will transact. Every farmer who milks cows should have a share of stock in the local creamery and thereby support the plant. If half of the farmers do not join the organization, and ship their cream to some other plant, they are increasing the difficulty of building up their neighbor's interests as well as their own.

A creamery can manufacture 100,000 pounds of butterfat into butter almost as cheaply as it can 50,000 pounds. The equipment is the same and the total cost is slightly increased. The profits come from the second 50,000 pounds.

"Result of the Vote 1915," shows the bar and all its usages, gambling, criminals, etc.

Being dumped into the garbage can.

Several interesting group models pressed home vital facts. "The Devil & Co., Unhilit, Brewing and Malting," was arranged side by side with "The Silent City." The graveyard, showing the 21 per cent die from alcohol drink.

"The Devil," showed Mr. William Smith from the savings of twenty years ago. There was a fine bungalow home with Bill Jones has from his twenty-five years savings a pile of boxes, barrels and bottles. The "Exhibition Saw Mill Co. and the Bar Room Hell Gate Exchange bore the respective signs. "Saw Mill Barn with Logs," Gin Mills Barn.

Very striking were the facts illustrating that one and one-quarter of all deaths from alcohol poison are taken into the system whether the drinker consumes one quart of beer, or one pint of wine, or two and one-half ounces of whiskey, and also that as a result of drinking one quart of beer, or one pint of wine, or two and one-half ounces of whiskey a man takes in one quart fourteen quarts and one pint of alcohol.

The charts and scientific posters strikingly brought out some appalling facts. One chart, "Titanic," brought out the comparison, 1300 lost with the Titanic, but far off arid off the number in the United States alone every eight days of the year. Another chart, "Drink and Drive," showed that in the U. S. drink helped to break up 9228 times every year; 184,569 in 20 years. A sad Canadian record was emphasized in a chart which showed that 490,000,000 is the annual bill of the Dominion and that an additional 490,000,000 taken to take care of the product, total \$189,000,000, or over one hundred and fifty dollars spent every minute, night and day, for beer in Canada.

The Claresholm U. F. A. cricketers are busy training, having secured a up-to-date outfit and in the mean time hope to take on successfully the 1914 competition of age, sex or weight.

The Claresholm U. F. A. cricketers are busy training, having secured a up-to-date outfit and in the mean time hope to take on successfully the 1914 competition of age, sex or weight.

Patrons and the Creamery

The farmer has a perfect legal right to sell the products of his farm in the market that will pay him the highest price, but there are certain moral obligations which are owing to other men and the community in which they live. There are certain responsibilities resting upon every citizen, which he cannot ignore and one of them is the development and protection of every interest that affects the community as a whole.

If an industry is established which has for its purpose the financial and industrial development of the community, then it is important that every citizen lend his effort to the support of that industry.

A cooperative creamery is an institution of this kind. It is here far as reaching and the extent of which depend entirely upon the volume of business which the creamery will transact. Every farmer who milks cows should have a share of stock in the local creamery and thereby support the plant. If half of the farmers do not join the organization, and ship their cream to some other plant, they are increasing the difficulty of building up their neighbor's interests as well as their own.

A creamery can manufacture 100,000 pounds of butterfat into butter almost as cheaply as it can 50,000 pounds.

The equipment is the same and the total cost is slightly increased.

The profits come from the second 50,000 pounds.

"Result of the Vote 1915," shows the bar and all its usages, gambling, criminals, etc.

Being dumped into the garbage can.

The creamery contains a definite amount of butterfat, which is determined by the Babcock test.

Cream contains the same amount of butterfat whether it is sweet or sour but may test differently due to the manner in which the sample was taken.

Men may read the test differently and so differences may arise all of which emphasize the necessity of the farmer knowing something about the test and the reason why his test will vary from time to time.

A creamery is the best agency through which the dairy industry can be established. A dairy community is in a class apart from all others, and it always advertises itself by better farms, better buildings, better roads, better services, good roads, better stock, better advertising, better advertising and a general atmosphere of social, moral and religious life a little above the average.

Carnforth

Carnforth July 4th celebrations passed off without any accidents worth mentioning except what well known Creek team in their match with Meadow Creek. Possibly the latter club's uniform was responsible for their night wakings of the hall and the score they piled up against the other team.

Mr. Vaudnais spent last week at the Webs' home in the hills.

Miss McVicker intends leaving shortly for her home in Calgary.

Some of the Bank boys spent Saturday afternoon at Meadow Creek.

Mr. Vaudnais and son Richard are hauling timber these days from the mountains.

Mr. Cummings who has been looking for oil the past week in the Hills, left Saturday for his home in Foothills.

Butley and D. Rundham drove through to the Perry Ranch north of town Sunday evening.

Mr. and Mrs. Nanton visited the Hawkins family a few days this last week.

The baseball boys have opened up a new practising diamond opposite Mauds' house.

Ball practice every Thursday evening at 7 o'clock, "try and come, boys."

Several of the young people attended the ball game and dance at Carnforth and report a very enjoyable time.

Automobiles of every description are to be seen daily on our trails. Oil has taken a very heavy toll, especially in this section of the country and seem very much satisfied with the prospects.

The recent rains have been very heavy in this vicinity and the crops have begun to jump. The farmers here are receiving about half a bushel less in the section of the country and seem very much satisfied with the prospects.

The recent rains have been very heavy in this vicinity and the crops have begun to jump. The farmers here are receiving about half a bushel less in the section of the country and seem very much satisfied with the prospects.

The ball game which was played at Carnforth Saturday evening to the baseball game. Sides were chosen by ex-president Foster and secretary Holding with the addition of 6 ladies in each side taking part. Mrs. Holding and Miss Maxwell were soon rattling up a big score and it was early demonstrated either the school or cricket crease must be moved. Ex-president Foster was early run out without scoring. Both bats were soon smashed, and made in Canada goods no longer appeal to Carnforth people. School teacher Hanne and trustee A. W. Hatt were the principle scores. The ladies croquet game was very interesting. Mrs. Holding, Mrs. Hanne, Mrs. Morris, Mrs. Hatt, Mrs. Nelson, Miss Nelly Neugren assisted by Mr. Alex Thompson, having a fine time together.

After lunch a dance was indulged in till 11 o'clock, and "Marching Fling" Georgia," was over.

John Maxwell had charge of the door.

Unhappily the school pump was broken but the hand pump got us along.

One singular feature of the day was the conspicuous absence of the Stars and Stripes, perhaps it was overlooked, one would like to think it is right or is it that

Americans have become so Canadianized that they have forgotten their Motherland, or is it that they are anxious for one Farmer's Day, in place of our so called patriotic patriotic day.

It is possible that the farmers are thinking some day.

Truth is, crops are decidedly lame, but cheer up. There's worse to come. Let's think about the Oil, and while we are here.

Don't forget your Annual Zia Wash next week at Trout Creek, and a rail down with the Rail of the world.

At Mr. Goode's place, everybody welcome, reformers

farmers, carpenters and sinners.

Come and have a good time is the

advice.

The Coldest Hour

The proverb which tells us that "the darkest hour is that before dawn" is not true for light comes in the morning as gradually as it decreases in the evening. The same is true of the cold. It is only in causes connected with the dependence of man on the sun that take place just before daylight and are an additional cause of the peculiar coldness of this time.—London Mail.

"Why aren't you dancing, Mr. Dix?"
He was out of town for the weekend, so I don't know any of the new stars.—Puck.

Bad Blood

It is the direct and inevitable result of irregular or complicated bowel and clogged-up kidneys and skin. The best way to get rid of it is to take a purifier which is allowed to accumulate wastes of blood and the whole system. Dr. Morse's Indian Root Pill acts directly on the bowels, regulating the motions, and so removing the ease and strength to properly filter the blood—and on the skin, opening up the pores, so pure blood and good health take.

HER LAST DEAL

And it was up to Harold to get what
ever consolation he could.

"Lucy, be calm, with all the earnestness
at his command, 'you have
driven me to despair aton. I have waited
so long for you to come to me to
care for me, but my waiting has
been unavailing. Now, I am going
to leave you, and my heart
ever dangers may lie in my way.'

"Please don't say such things, Harold.
Surely there is much for you to
live for."

"If I ever return it will be with
the scars of that upon me. I shall
not be faced I shall hear our glorious
colors. I shall come back as a
soldier."

"That should always to a soldier's
sentiment. I am glad to hear you
are back."

"Thank you. By saying one word
you could keep me here in that
dreadful country."

"It is a girl's urge to urge men
to do heroic, not to try to persuade
them to do the best that can be done."

"I suppose you're right. Well,
shall not he beat to the call?"

"I had to hear you say that."

"Goodby, Lucy, goodby."

"I have no last word to say to
you before I leave you. Goodby."

"What is it, Lucy?"

"Don't get shot! Harold, don't even
try half shot! Chicago Record-Ad-

ad.

Inhaling Spaghetti

There is a non-polar effect to the
fact that the Neapolitan eats his
spaghetti with a fork and then lifts it in
the air and then lets it fall down
and starts it down his throat. He then
resumes from the spaghetti, which
has become rather like a paper
cage, a boy of a boy from similar trouble
and in a few weeks after he began
to eat his spaghetti at all, he
had to be hospitalized with a fever
and a cold. The doctor said he had
the trouble since I am convinced that
there is no medicine like Dr. Wil-
liams' Medicine.

The old man scratched his head
regularly and said, "I have a
regular doctor, but he doesn't
know what he is talking about."

"I am sorry you left the call,"

WEDNESDAY, JULY 8, 1914.

Advertisers are recognizing that well-worded advertisements, attractively presented to the public will fail if effect if the medium by which these are given to the public has not other elements of interest to the reading public which commend it and give added prestige to the advertisement. In other words if the newspaper is not newsworthy and readable, the advertisements have not the influence which they would have if these conditions were present. The advertiser has undeniably the largest circulation of any newspaper in this town and district and it has taken a foremost place in the esteem of the reading public. In policy of fitting news columns with local and country news has borne fruit. The man is on the advertising scene last week crowded out much matter which we should have liked to have had appear. The national holiday and this extra demand coming to the market prompted us from publishing a news supplement. We received the examination return late on Tuesday evening but were unable to make provision for this most interesting matter in last week's issue. Several other live news-items were

also left over. Our editorial spaces has also been encroached upon lately but we are taking steps to provide more space to accommodate all departments of the paper.

Here we wish to emphasize the fact that only by having all the advertising patronage can a newspaper also give a large amount of live local news matter. And too it is equally true that in proportion as a local newspaper in a small town receives a liberal patronage in the job printing line can it be in a position to give a large amount of news matter space in its columns. Every inch of local news matter costs more to print than an inch of advertising and the limited space for advertising makes a revenue absolutely necessary from job printing. We are in a position to serve as fully as well and as cheaply as any office in any town of this size. The advertiser is entitled to this patronage.

Give Him Your Name

In connection with the excursion to Banff on July 22nd, in order that arrangements may be made for the trip, all Oddfellows and Rebekahs, who wish to take advantage of the special cars for Claresholm, will please give their names to W. T. Cochran, secretary of Foothills Lodge, I.O.O.F., at once as the space will be limited and full provision is desired to be made.

MILL AT
FURMAN, ALTA.OFFICE:
CLARESHOLM, ALTA.**The Brewer's Appeal**

(Contributed by W. G. T. L.)

Letters are being sent to Senators and members of Congress by brewers and liquor dealers, protesting that the proposed Prohibition amendment to the Constitution would be "the greatest calamity that has ever befallen the nation; that it would wipe out the revenue from an investment of over \$4,000,000,000; create an army of idle men, and bring about a financial panic more serious and lasting than any that has ever been experienced in the nation.

To patriots who have at heart the highest and best interests of the nation, who value the health and character of the young, the head of the family, the home, the implements, no matter how vast, even the wiping out of \$4,000,000,000 business would not seem as appalling as the continuance of an institution which yearly debases the character of the adult, intellectual and moral life of the nation.

However, dealing with the statements made by a purely economic point of view, we can view them through the eyes of the authority on labor problems, Rev. Charles Stetzel, for many years at the head of the labor department of the Presbyterian Church. Estimating the annual drink bill at \$1,000,000,000, the amount spent by the consumer for bread and clothing as above the same and supposing that the consumer is in the habit of buying liquor, all this money should be turned into legitimate channels and be spent for bread and clothing, what, he asks, would be the effect of such a policy?

From statistics secured by him from the Bulletin of Statistics on Manufactures of the Royal Statistical Society, Mr. Stetzel found that the \$800,000,000 now spent for liquor were used to purchase such useful commodities as bread and clothing, employment would be given to eight times as many men as are now employed. If we receive five and one-half times as many workers, who collectively would receive five and one-half times as much wages or nearly \$20,000,000 more, and the cost of the new material necessary to produce \$1,800,000,000 worth of bread and clothing (retail price) instead of liquor, would be equivalent to the cost of the liquor industry now uses, and this of course, would mean the employment of an additional large number of workers.

McFarland—McKerral Naptials

A quiet wedding was solemnized at the home of Mr. and Mrs. Hagerman, Parkland, on June 26th. When Miss Dora Mc-Kernal of Chatham Ontario married to Mr. John McFarland of Foothills, Alta. The ceremony was conducted by Rev. J. Kennedy. The house was decked with decorations and ferns, and the wedding march was played by Miss M. Hagerman. The bridal gown was of cream satin with trimming of shadow lace and orange buds. The young couple left for a short wedding tour. The bride travelling in a tailored suit of grey and banana hat trimmed with deep red roses.

Notice

Notice is hereby given under Section 210 of the Royal Municipalities Act and of The Royal Municipality of Argyle, No. 99, dated the 13th day of June, 1914, that the following property on the fourth day of June, 1914, in the Pound kept by the undersigned in the n.e. 1/4 sec., 24, twp. 11, range 25 west of 4th meridian, will be sold at public auction, one score marks, bounded on left shoulder by One black or dark grey horse — branded on right side — One buckskin pinto mare — branded on left hip x — Dated June 13th, 1914 — 7
Pound No. 1, Robt. Whitehead
Granum, Foundkeeper.

Final Notice
To
Water and Light Customers

It being absolutely necessary that all accounts for water and light be paid in full every month. All customers are hereby notified that if their accounts are not paid by the 10th day of the month that the service will be cut off without further notice.

In this case a charge of 50c is made for reconnection.

John F. Reynolds,
Secretary

Over a hundred and fifty citizens of Claresholm visited to Calgary Exhibition.

TO RENT

A good piano in excellent condition to responsible party, where there are no children. Apply Box 125.

PRIVATE SALE

Of household articles including: dining room suite, bedroom suite, refrigerator, washing machine and kitchen set. All well worth the asking price. J. G. CUMMINGS, Fourth Ave., Claresholm

BOARS FOR SALE

A few young Dusky-Jersey boars, pure-bred, for sale, offer available for but a short time. Place order at once. J. H. Walton, Willow Bend Ranch, P. O. Box 1, Claresholm, Alta.

SOVS FOR SALE

For sale 3 registered pure-bred Poland China Sows. Also One Bear Poland China pure-bred, eligible for registration, J. F. Hagerman, Phone 130, Claresholm, Alta.

TENDERS WANTED

Tenders will be received by the undersigned up to Wednesday, July 1st, for the laying of floor, painting the interior, etc. of the Trout School building. For further information apply to the secretary-treasurer, H. R. Smith, Phone 1802, Claresholm, Alta.

Any or all tenders not necessarily accepted.

NECESSITY NOT VANITY

In the old days, when a person had a photo taken, he was considered vain, but in these modern times, when our friends and relatives move to new lands, we find a photo of real value, not only to picture distant friends the love and concern of our children, but in keeping a family record of the changes that take place in our lives. If we have a photo that can't be taken, we suddenly find away from us we would fly to the nearest photographer and have its photo taken. Every family should be picture worthy and should have their children photographed, either separately or in a family group.

WEST INTERESTED IN SUBJECT OF IRRIGATION

USE OF WATER IN IRRIGATION
OCCUPIED ATTENTION OF
MEET IN AGES PAST

The Eighth Annual Convention of the Western Canada Irrigation Association to be held in Medicine Hat, B.C., this year—Prominent Men Will Take Part in Proceedings.

On the tablet of clay at Babylon, many years ago, were engraved rules for the use of water in irrigation. Today, books, magazines, pamphlets and articles on the same subject are to be found in every library. In Egypt, in Mexico, in India and in South America are remains of irrigation systems which are evidence of the highest engineering ability, which were constructed for the safety of the people. British Columbia, its fruit-grower of today constructs a modern system from any available material.

For a long time past, irrigation has been used time and time again by students of irrigation when holding forth on agriculture, and it is only natural to appear as if these advocates were really galing discriber, for the irrigation of the prairie provinces of Alberta and British Columbia is daily.

The eighth annual convention of the Western Canada Irrigation Association will be held at Medicine Hat, Alberta, on August 17, 18 and 19. The program will be as follows:

On it figure the names of Hon. H. Bark, of Boise, Idaho; G. Houston and W. C. McMillen, of the Interior, Calgary, Alberta; H. C. McMillen, former general live stock agent of the Canadian Pacific Railway, Winnipeg; Dr. J. G. Rutherdale, superintendent of agriculture, and natural resources, Canadian Pacific Railway, Vancouver; Arthur G. D. Smith, International Irrigation congress, who is to meet in Calgary on Oct. 6, 7 and 8; and Dr. W. C. McMillen, strong lecturer for the Canadian Pacific Railway, Montreal; Frank Adams, who is to speak on irrigation investigations in the University of California, Berkeley; C. L. Smith, agricultural engineer, Portland, Oregon; J. W. Eastham, botanist to the Dominion government; Dr. W. C. Binkley, of the Oregon irrigation congress, and many other men of the culture who are making irrigation a success in the West.

In the Okanagan valley, through which the delegates must travel to reach Penticton, is not only one of the most fertile districts in the West, but also the centre for many large irrigation projects both under construction and in the planning stage, passed in grandeur of scenery, it is also possessed of a most delightful climate, with the mountains, the mountains, rushing white-clipped streams and green pastures and a climate far above the crystalline lakes.

Penticton, the convention city, situated in the heart of the district that has been aptly called the "Cathedral of the West," is one of the great mountains, it lies at the southern extremity of the Okanagan Lake and is the gateway to the West, the Okanagan from its smaller, but less beautiful sister, Lake Skaha.

When the convention is completed through the Hope Mountains, Penticton is only nine miles from Vancouver—the next time it is twintime. On account of its great natural beauty, this is a most productive area, and if it is developed, will be one of the most important and largest distributing points in the interior of British Columbia.

It is the Okanagan valley which has carried off the premier honors at all the great horticultural shows and in the West, for many years.

Although this district has had to compete at these shows against districts which are more advanced in its agriculture, its produce has always made more than a creditable showing, the price and the books of these various shows will prove. There are in the Okanagan land that will produce bountifully of fruit and other crops with the soil and water, and the cost of supporting in comfort, and even luxury, a quarter of a million families, who are to be found in the various colonies under a perfect climate, with every facility of inter-communication, education, religion, etc., the material advantages of the city added to the many greater advantages of country life.

But there is one thing, and one thing only, that will be the chief factor of arousing all this fruit, supporting these families giving hundreds of people a home, and that is irrigation, that word which for so long has meant so much to so many people in all parts of the province.

MORAL TO CHAMPION

First Sail Turned on Site Where He Stood on Nepean Point

On the very spot as accurately as history can make it, one hundred and one years ago Samuel de Champlain, the great explorer, called at the Nepean Point, the Indian station stood when he turned his rugged face towards the sun to remain the last time on the site of which his name will be written in history. Mrs. Thomas Ahearn, president of the Ottawa Women's Club, turned the first spadeful of earth in the presence of members and delegates of the Canadian Historical Society. She was assisted by Mr. Clarence M. Warner, Minister of Education, the president of the Ontario Society.

Prunes in the Santa Clara valley, which is the heaviest producing section of California, can probably not grow more than 55 to 60,000,000 pounds of fruit, and the agricultural community of the state of California can not produce so many. The Russian mind cannot understand how a man engaged in the business of alleviating suffering can put a price on life, but it is true.

After this it is not surprising to learn from the same authority that in the same country the medical profession is not overcrowded.

RAPID TRANSPORTATION

Flying Train at Eight Hundred Miles an Hour

The latest thing in engineering is a flying train, without wheels, wings and propellers, that can travel at anything between 200 and 500 miles an hour!

The inventor of this flying train is Mr. Emile Bachelet, a French gentleman by birth, who told the Lord Mayor of Liverpool, when presenting your mails from Liverpool to London in less than an hour, and you can get a train to Paris in 10 hours.

The principle of the flying train is very simple. For many years it has been used to move ships, and it is a certain type when charged by an alternating current repeats, instead of a ship, which was known; in 1818 that it had succeeded in so increasing the power of repulsion as to move a ship and keep solid bodies floating in the air, called "modern magic."

He showed the Lord Mayor that the flying train could be used to move British and American claims in the British Columbia tribunals, and the British claims in the Canadian tribunals.

Mark Twain's judicious sketch of a certain George Fisher, deceased, was never well known, but United States troops in 1813 well known; in 1818 was a certain number of subsidiary claims, so that when the humorist "let go his hair" when he recurred in damages and various accrued interests, something like \$200,000.

He showed the Lord Mayor that the flying train could be used to move American debts.

The record of the American and British claims tribunals in the British Columbia tribunals, on August 17, 18 and 19. The program will be as follows:

On it figure the names of Hon. H. Bark, of Boise, Idaho; G. Houston and W. C. McMillen, of the Interior, Calgary, Alberta; H. C. McMillen, former general live stock agent of the Canadian Pacific Railway, Winnipeg; Dr. J. G. Rutherdale, superintendent of agriculture, and natural resources, Canadian Pacific Railway, Vancouver; Arthur G. D. Smith, International Irrigation congress, who is to meet in Calgary on Oct. 6, 7 and 8; and Dr. W. C. McMillen, strong lecturer for the Canadian Pacific Railway, Montreal.

When the Lord Mayor held an audience on the hill above the

mountain, he was asked, "What is the flying train?"

He replied, "It is a flying train."

He then said, "It is a flying train."

WELL KEPT RECORDS

Methodist Conference Speaks Before Agricultural Secretaries—Interesting Discussions

In an address before the Agricultural secretaries at Regina, Dr. Gray, of the Methodist Conference, laid emphasis on the value of well-kept farm records on the value of agriculture. The secretaries who were asked to get records from the application of their labor must make business records, and it is important that the practical side of farming, was inevitably, lead to loss.

Records were divided into three facts and even so, second, financial records designed to show profit and loss, and third, of cost accounts. The first two are not so important as the third, of cost accounts. The records are to be kept in the head. Under each condition, such practice is not suitable.

Mr. Dunning developed the commercial idea in opening his address, drawing a picture of the farmer who is successful among farmers, showing plainly that the methods of most progressive farmers were really the outcome of xerophytic.

THE MOST PROMISING OIL FIELD IN ALBERTA

THE CLARESHOLM OIL COMPANY, LIMITED

Non-Personal Liability

Non-Assessable

Only a Small Portion of 75,000 Shares Left at 75 cents

Sulphur Gas, and Oil Seepages, evident on the Claresholm holdings

Claresholm stock is the best on the Market.

Only 2000 feet to the Oil bearing sands.

What Geo. A. Reynolds Says of Claresholm Oil Fields

Calgary, Alberta, June 10th, 1914

To the Directors of The Claresholm Oil Co., Ltd.

Gentlemen:

Today completed my examination of the land held by your company and the result is respectfully submitted in the following report:

A pronounced anticlinal dome is the distinguished feature that first impresses the beholder. Beginning at the north end at what is known locally as "The Canyon Ranch,"¹² is an east and west fold extending in a south-easterly direction. From this point two folds running north-south were easily traced for a distance of six miles.

The escarpment is massive showing exposures of Belly River and Niobrara sandstones and Cleggett shales with a strong trace of Dakota sandstone.

Escaping sulphur gas causes a discoloration of the water of the creek for several miles. This gas being found so far distant from the base of the escarpment indicates the depth at which oil or gas should be developed will not exceed 2000 ft. This gas it is believed comes from lower formations either the Paleozoic limestones or the Dakotas—more probably the limestones. However if an oil field is developed in this region your property will be only situated being located almost at the center of what is now considered the most prospective field and which is about to be tested with a number of wells both south and north of your property.

The porous sandstones of the Dakotas are covered by the impervious shales of what should be the Cleggett-Benton formation.

The folds slope gently and the structure of the dome is favorable for an accumulation of petroleum. With these two factors very much in evidence considerable production might be probable.

In conclusion we are glad to say that if there is oil in paying quantities in the Alberta field you will find it underlying your property, and the condition is so evident that nothing more could be said on behalf of your territory.

Respectfully submitted,

GEO. A. REYNOLDS

Geo. A. Reynolds, was three years with the Southern Pacific in their oil fields in Texas; three years with Standard Oil as a practical expert in oil fields and oil drilling; he stands among the most prominent in the recent development of the wells and diggings in the Calgary and Okotoks districts; and is the man who pioneered and drove the now famous McDougall-Segur well.

Every cent received from the sale of stock will be used for development purposes

Drilling will commence as soon as the first issue of stock is sold.

All leases paid for in stock in the Company.

Prospectus and other literature may be had upon application to

CLARESHOLM OIL CO., LTD.
